

## The Business Challenge

Policies and procedures govern the day-to-day operations of every organisation - ensuring compliance with regulations, guiding decision-making, promoting a culture of integrity, and streamlining internal processes. And yet many organisations persist with Legacy PDF based policy management systems that cannot cope with:

Rapid policy and regulatory change

The need for secure operating procedures for a dispersed workforce

Increasing compliance measurement and reporting obligations

Leveraging the power of Ai without risking the security of corporate

## Poor Policy Management Adversely Impacts Cost, Risk and Compliance

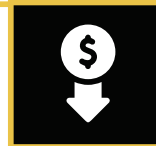

### Cost increases

From wasted time searching for documents

### Risk Increases

From compromised security and poor version controls

### Compliance Decreases

From decisions made on out of date information

# The Solution

## Policies Re-imagined by Revealr

Revealr's Digital Twin technology transforms policies, procedures and regulations into easily accessible web pages, eliminating downloads and version control issues.

Your staff access the digital twin of any page, of any document, on any device, in any language.

## We've Re-imagined Policy Management

### For Staff, we've reimagined usability and productivity

Easily access any page of any policy, related procedure and regulation

Use Revealr AI tools to query, summarise and create actionable insights – in a secure trusted environment

Consume the content on any device, in any language
